Education

North Carolina State University

Master's · Computer Science · North Carolina, USA

Aug 2025 - Present

GPA: 3.67/4

- **Relevant coursework:** Design and Analysis of Algorithms, Neural Networks, Automated Learning and Data Analysis, Cloud Computing.

Rajagiri School of Engineering and Technology

B.Tech · Computer Science · Kerala, India

Aug 2018 - Aug 2022

GPA: 8.88/10

- Graduated with Honors
- Received Merit Award in Mathematics
- **Relevant coursework:** Data Structures, Logic in Computer Science, Discrete Mathematics, Object-Oriented Design Principles

Experience

Informatica Business Solutions Private Limited

Consultant · Full-time

Apr 2025 - Jul 2025

Bangalore, India

- Streamlined processes and system operations through targeted analysis and continuous improvement practices, utilizing data governance methodologies and integration solutions.
- Collaborated with stakeholders and Enterprise Architects to evaluate metadata and identify gaps in the Data Governance platform, implementing Python-based automation to generate lineage data and optimize system operations, resulting in a 40% cost reduction.
- Enhanced data classification by leveraging CLAIRE AI with Python to automate metadata tagging, streamlining workflows and eliminating over 200 hours of manual effort.
- Managed the creation and execution of test cases for Monitoring Agent utilities, using Python to validate alert functionality and workflow efficiency.
- Coordinated with development, business, and technical teams to deliver solutions aligned with client objectives, leveraging project management and stakeholder collaboration skills.
- Conducted interactive training workshops enabling clients to effectively utilize software platforms, using clear communication and practical demonstrations.

Informatica Business Solutions Private Limited

Associate Consultant · Full-time

Jul 2022 - Mar 2025

Bangalore, India

- Automated report generation pipelines using Python and PowerBI, implementing data cleansing, aggregation, and validation logic to reduce manual report preparation effort by 75% and improve data accuracy and consistency by 30%.
- Resolved critical client issues and product escalations quickly, ensuring minimal downtime and high client satisfaction with Informatica Cloud products.
- Mapped client business processes to technology solutions and identified opportunities to streamline operations, improving client satisfaction scores by 25% and reducing project timelines.
- Leveraged SQL, Python, and cloud-based integration tools to analyze large metadata datasets, identify system inefficiencies, and implement solutions that improved platform performance.
- Balanced multiple client priorities in fast-paced environments, demonstrating strong ownership and adaptability across simultaneous projects

Projects

Customer Review Using Facial Recognition · CNN, Python, Pandas, NumPy, Machine Learning

- Developed a deep learning neural network for real-time facial expression recognition using the PyTorch framework, achieving ~80% accuracy across 7 emotion classes.
- Designed to provide an analytical review of a customer's sentiment while using a product or service, serving as an advanced market research tool.

NLP model for movies review classification · Python, NLTK

- Implemented a Natural Language Processing model to classify movie reviews into negative, positive, or neutral sentiments.
- Focused on a low-resource Indian language, demonstrating proficiency in multilingual text analysis.

Java Industrial Project - Spring Boot · Java, HTML, CSS, Bootstrap

- Engineered a full-stack application with Spring Boot as the backend, integrating HTML, CSS, and Bootstrap on the frontend and implementing secure user authentication and data persistence.

Skills

Programming & Data Engineering: Python, SQL, Java

Machine Learning & Statistical Computing: TensorFlow, Keras, NumPy, SciPy

Data Governance & Cloud Platforms: Informatica Cloud (Data Governance, Data Integration), Metadata Management, Lineage Analysis

Analytics & Visualization: Power BI, Data Analysis, Reporting Automation

Technical Strengths: Workflow Automation, Cloud Data Integration, Data Modeling Concepts

Collaboration & Leadership: Stakeholder Management, Client Communication, Cross-functional Collaboration
